## New Aseptic Line Now operational at our facilities

At Florida Products we believe in technology to improve our operational efficiency, enhancing thus, our products and services to our final customers. We are fully committed to quality and we truly believe that only thru continuous investment in high-end equipment and in world-class training to our staff, we will be able to deliver the best products to our customers.

Expanding our product portfolio implies more complicated processes, that need now to be more flexible and with fast capacity to adapt to the wide range of products available. This is why, we are now making operative a better equipment in order to be prepared to the new challenge of having a big variety of products. Costa Rica being an excellent source of fresh fruits and vegetables, whole year round, pose a big opportunity to develop new opportunities of innovative products, becoming this new products from our R&D team or even from our customers propositions.

### Some advantages of the new equipment are:

- Aseptic and frozen high quality products.
- Specialized and premium products produced together with our new ICEGEN equipment (Newsletter #18).
- Products with great flavor that keep the nutritional properties.
- Guaranteed microbiological safety thru the whole process.
- Cost reduction achieved thru the more efficient process.
- Increased productivity and final quality.
